Adhesive Performance

The adhesive is characterized by a high initial tack, excellent adhesion and good low temperature performance on a wide variety of substrates.

Applications and use

Opac `coverall ` materials are traditionally used for overlabelling of errors or size changes on existing printed materials or for barcoding where the underlying substrate may interfere with scannability.

Conversion & printing

Facestock provides excellent print quality by all the usual printing technologies. Excellent conversion characteristics in flat-bed and rotary on wide-web presses with high conversion speeds.

Special Approvals

The adhesive complies with the European food directives and legislations, FDA 175.105 and the German recommendations XIV as published by BfR. BfR (Bundesinstitut für Risikobewertung) is the German Federal Institute for Risk Assessment. The adhesive can be used in direct contact with dry and moist, non fatty foodstuffs.

Shelf life

Two years under storage conditions as defined by FINAT (20-25°C; 40-50%RH)
