Applications and use

This product is designed for Wine labelling, it is suitable for primary labelling of high and premium goods eg: spirits, specialist foods. Due to its high stiffness it is not recommended for labelling on small diameter surfaces (neck labels) or more difficult curved bottles. It is important to apply adequate pressure during the labelling process to ensure a good adhesion performance on the substrate. In addition bottles should be washed and dried before label application to ensure optimum adhesion. It is recommended to run a dispensing test in order to check that pressure is adequate, especially in case of more complex label shapes.
